Management Discussions and Analysis

INDIAN ECONOMY

The Economy of India is the seventh-largest in the world by nominal GDP and the third-largest by purchasing power parity (PPP). The country classified as newly industrialized country, one of the G-20 major economies, a member of BRICS and a developing economy with approximately 7% average growth rate for the last two decades. India's economy became the world's fastest growing major economy from the last quarter of 2014, replacing China's. It is widely expected that a further momentum to growth will be provided by declining oil prices and increasing monetary easing facilitated by ongoing moderation in inflation. The long-term growth prospective of the Indian economy is moderately positive due to its young population, corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. The Indian economy has the potential to become the world's 3rd-largest economy by the next decade, and one of the largest economies by mid-century. And the outlook for short-term growth prospective is also good as according to IMF, the Indian economy is the "bright spot" in the global landscape, India also topped World Bank's growth outlook for the year 2015-16 for the first time with the economy grown 7.3% in 2014-15 & expected to grow at 7.5-8.3% in 2015-16.

India's two major stock exchanges, Bombay Stock Exchange and National Stock Exchange of India, had a market capitalization of US\$1.71 trillion and US\$1.68 trillion respectively as of Feb 2015, which ranks 11th & 12 largest in the world respectively according to the World Federation of Exchanges India also home to world's third largest Billionaires pool with 97 billionaires in 2014 and fourth largest number of ultra-high-net-worth households that have more than 100 million dollars.

After freeing the industry in 2004-2005 from a number of limitations, primarily financial, the government gave a green light to massive investment inflows - both domestic and foreign. During the period from 2004 to 2008, total investment into textile sector increased by 27 billion dollars. Ludhiana produces 90% of woollens in India and is known as the Manchester of India. Last year, the exports of textiles and clothing stood at USD 39.31 billion against the export target of USD 43 billion.

Exports of cotton textiles (excluding raw cotton) during 2014-15 was USD 9,452.96 million as against exports of USD 9,669.05 million in 2013-14, registering a negative growth of 2.23 per cent.

THE SECTOR HAS BEEN POSTING STRONG GROWTH OVER THE YEARS

GOVERNMENT INITIATIVES

Make in India is a major new national programme is on 25 sectors. Including textiles and garments designed to facilitate investment, foster innovation, enhance skill development, protect intellectual property and build best in class manufacturing infrastructure in the country. The primary objective of this initiative is to attract investments from across the globe and strengthen India’s manufacturing sector. It is being led by the Department of Industrial Policy and Promotion (DIPP), Ministry of Commerce and Industry, Government of India. The Make in India programme is very important for the economic growth of India as it aims at utilising the existing Indian talent base, creating additional employment opportunities and empowering secondary and tertiary sector. The programme also aims at improving India’s rank on the Ease of Doing Business index by eliminating the unnecessary laws and regulations, making bureaucratic processes easier, making the government more transparent, responsive and accountable.

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

Some of initiatives taken by the government to further promote the industry are as under:

- Duty free entitlement to garment exporters for import of trimmings, embellishments and other specified items increased from 3 per cent to 5 per cent. This initiative is expected to generate an additional RMG exports estimated at ₹ 10,000 crore (US\$ 1.61 billion).
- The government has also proposed to extend 24/7 customs clearance facility at 13 airports and 14 sea ports resulting in faster clearance of import and export cargo.
- The proposal for imposing duty on branded items was dropped providing relief to the entire value chain.
- The Ministry of Textiles has approved a ‘Scheme for promoting usage of geotechnical textiles in North East Region (NER)’ in order to capitalise on the benefits of geotechnical textiles. The scheme has been approved with a financial outlay of ₹ 427 crore (US\$ 69.12 million) for five years from 2014-15.
- The Ministry of Textiles, Government of India plans to enter into an agreement with Flipkart to provide an online platform to handloom weavers to sell their products.

Bombay Rayon Fashions Limited

- The foundation stone of the Trade Facilitation Centre and Craft Museum was laid by Mr Narendra Modi, Prime Minister of India at Varanasi.
- Detailed arrangement for purchase of cotton from the farmers by the Cotton Corporation of India Ltd (CCI) under the Minimum Support Price Operation was monitored. 343 purchase centers were finalised in consultation with the State Governments after meetings with officers of CCI and the cotton producing states, resulting in streamlining of operations.

OPPORTUNITIES AND THREATS

For 2015, the U.S. economic growth has been revised up to 3.6 percent, largely due to more robust private domestic demand. Cheaper oil is boosting real incomes and consumer sentiment, and there is continued support from accommodative monetary policy, despite the projected gradual rise in interest rates. Policy responses, together with the oil price boost and Dollar depreciation, are expected to strengthen growth of your company in 2015-16. The growth forecast for China, where investment growth has slowed and is expected to moderate further, has been marked down to below seven percent. The authorities are now expected to put greater weight on reducing vulnerabilities from recent rapid credit and investment growth and hence the forecast assumes less of a policy response to the underlying moderation. This lower growth, however, is affecting the rest of Asia. The big business houses in the USA and Europe manufacturing and dealing in textiles and garments depend upon India, China and the neighbouring countries, due to availability of the raw materials and skilled labour at lower prices in these countries, to get the required output at the lowest possible cost. China, Europe, Japan along with the U.S. (the four largest economies in the world) will largely determine the direction of the global economy through the rest of this year and into 2016. The good news is that the advanced economies overall will perform more strongly and contribute more to global growth in 2015.
